Experiences

Digital Experience Director at H&M

(May 2023 - present)

- Built and grew the design team from 2 to 7 people, leading a cross-regional group spanning Stockholm, Bangalore, and Shanghai, and fostering a collaborative global culture.
- Elevated design maturity in the organization, expanding the team’s scope beyond visual craft to include user research, workshop facilitation, and the use of follow-up metrics to measure impact.

- Initiated and co-led the development of a comprehensive design system from the ground up, establishing scalable processes and a robust contribution model for continuous improvement.

Competence Lead of Product Design at H&M China

Cross-product teams: APAC hub + Sourcing & Production

(May 2021 - May 2023)

- Expanded and developed the local design team from 3 to 5 people, establishing clear design processes and improving collaboration across product, engineering, and business stakeholders.
- Initiated the localization of the design system, tailoring global tools and guidelines to better meet the unique behaviors and needs of Chinese users.
- Introduced and facilitated design thinking methodology in the organization, designing and leading design sprint workshops for the China market that uncovered new opportunities to enhance customer lifetime value.

Expert-Vetted product designer at Toptal & Upwork

(January 2019 - Present)

As an independent design consultant, I combine hands-on problem solving with strategic leadership, adapting quickly to project needs. Expert-vetted by Upwork and Toptal, I empower startups and global teams to turn ideas into intuitive, usable products. Key projects include:

- VoicePing - Served as both product owner and designer, growing a global team (10+ members) spanning Europe, Japan, India, and Brazil. Led the development of a SaaS platform to improve remote team productivity, with a core focus on the Japan market.

- CultureTrip - Directed product design efforts for China, introducing a localized design language and strategy. Successfully launched a WeChat official account and grew followers from 1,000 to 50,000 in three months by adapting products to local preferences.
- ServiceRocket / Vibe.us …etc. - Led user research and remote workshops as an independent consultant, partnering with stakeholders to identify user problems and define product strategies and roadmaps.

Product Design Manager at PatSnap China

(August 2018 - January 2019)

As a product design manager, I built and led a cohesive remote design team across mainland China, recruiting talent and fostering a collaborative culture. I focused on mentoring junior designers to raise capability, championed customer-centric design by defining and implementing design processes, and launched the team’s first design system along with a structured local user research practice. By partnering with key stakeholders, I helped shape core product initiatives and built the product roadmap to align with business goals.

Team Lead of Product Design at FarFetch

(January 2018 - August 2018)

I transformed the team from a UX-focused group to a full product design practice within three months, collaborated with stakeholders to enhance the checkout process by adding customs clearance, and led user research to translate customer insights into actionable product plans for the local market.

UE Manager at oTMS.com

(July 2015 - December 2017)

Built and recruited the design team from scratch, established the company’s first UI kit and design process, and co-developed

the new product development workflow with leadership. Additionally, I led key product initiatives and guided the team to explore new ideas for product-market fit, which significantly reduced deployment time and drove cost savings.

UX Designer at Cisco WebEx

(August 2009 - June 2015)

Closely partnered with product managers and design leads to transform ideas into detailed, actionable design solutions. Defined interaction design, user flows, and accessibility features for users with disabilities. Collaborated with engineering for implementation, led external vendors in prototype development, and contributed to setting team goals and leveraging strengths across multiple projects.

UX Engineer at Ctrip

(March 2008 - July 2009)

Designed Ctrip’s first vacation channel, gathered requirements with stakeholders, built the front-end framework, and supported technical implementation and quality control.

Freelancer

(October 2006 - February 2008)

Worked as a freelancer, helping clients plan, design, and implement websites to support company brand marketing after graduation.
